

I am very concerned about interference to Part 97 amateur radio operators by a BPL system. The power lines are unshielded and will act as an antenna. Please place the burden on the Part 15 user to eliminate the interference if it takes place. Other HF public service agencies may also be affected. I also have concerns about aircraft navigation and communication interference as I plan to become a student pilot within the coming years.

Regards,

Ken Rogers, AF4ZR
